

DMSWG March 17, 2008 Telephone Conference Summary (1:30-2:15 PM Eastern)

Members in attendance: Lauren Dolinger Few, Patty Zielinski, Vivian Matter, Wade Van Buskirk

Topic: Coordination of Pacific coast regional responsibilities

- Prior to the call V. Matter asked W. Van Buskirk to go over the preliminary list of programs that P. Zielinski put together in November to see if there were any additions or other changes. W. Van Buskirk discussed the state programs he was planning on entering. There was a discussion as to how to input some of the information. For example, there are several surveys that fall under the general California Recreational Fisheries Survey (CRFS). It was agreed that each individual component survey should be inputted separately to more closely follow the way MRFSS is being inputted. **Action Item: W. Van Buskirk will send V. Matter a list of the programs he will be responsible for inputting. DONE.**
- P. Zielinski agreed to be responsible for inputting the MRFSS program data that was operating on the West Coast prior to 2003, when it changed over to the states.
- L. Few agreed to help W. Van Buskirk with a script to automatically upload information on data elements.
- Since W. Van Buskirk was joining the project so late it is anticipated that he will need until the end of April to complete his input of program data into MDMS.
